SITE LICENSE AGREEMENT FOR LTR_STRUC

This Site License Agreement is between the University of Georgia Research Foundation, hereinafter referred to as “UGARF” and your laboratory, hereinafter referred to as "You" or “Your”, for the retroviral sequence search algorithm known as “LTR_STRUC” that is downloadable from the website of Dr. John McDonald at the University of Georgia (“UGA”). This is a non-exclusive, non-transferable, and revocable Site License to make permitted use of LTR_STRUC for the purposes of Your genetic research, subject to the provisions of this Agreement. Accordingly, You agree as follows:

I. LICENSE: Subject to Your fulfillment of Your obligations under this Agreement, You are hereby granted a Site License to use LTR_STRUC and to download LTR_STRUC from the website of Dr. John McDonald at UGA. The term of this License shall continue so long as the terms of this Agreement are met.

II. OWNERSHIP AND USE OF LTR_STRUC: You understand that the copyrighted LTR_STRUC has been developed by Eugene M. McCarthy at UGA at substantial cost, and that ownership of LTR_STRUC shall during the term of this Site License and thereafter always remain with UGARF notwithstanding Your right to the use of LTR_STRUC. LTR_STRUC is a trademark owned by UGARF. You may use the LTR_STRUC trademark only in conjunction with the uses of LTR_STRUC permitted under this Agreement. You acknowledge that You shall not obtain any right, title or interest in and to any UGARF copyright, trademark or other proprietary right related to LTR_STRUC and You agree not to remove, alter, cover or obscure any copyright, trademark or other proprietary rights notice on LTR_STRUC as supplied hereunder.

III. SCOPE OF ACCESS: You may download (i.e., transfer, by electronic or other means) LTR_STRUC to a hard disk or other similar data storage device attached to one (1) central processing unit owned and operated by You, and maintain LTR_STRUC on such a storage device for multiple user access by individuals working within Your laboratory. You must take all reasonable precautions to insure that use is restricted to the authorized users.

IV. LIMITATIONS ON USE: You are entitled to non-exclusive use of LTR_STRUC and LTR_STRUC itself is subject to the following limitations, and Your rights are only those set forth, UGARF reserving to itself all other rights of every kind:

A. Your permitted use shall include all research and educational uses of LTR_STRUC, provided such use is not undertaken for purposes of providing commercial services or for producing a commercially published computer program which includes extensive portions of LTR_STRUC licensed under this Agreement or which reproduces all or part of LTR_STRUC licensed under this Agreement in a form differing from the original form primarily as a result of mechanical, electronic, or other similar manipulation. An example of a permitted use is performing searches on DNA sequences to identify sequences of retroviral origin. An example of a use that is not permitted is publication of a search algorithm from that supplied by UGARF if such program does not reflect the addition of significant value by the author. You are not permitted to modify or make derivative works of LTR_STRUC.

B. In any event, all prohibitions and restrictions upon the use of LTR_STRUC enunciated in this Agreement apply equally to reformatted versions of LTR_STRUC whose data format has been modified to permit easy use and analysis on other data processing systems, and such restrictions
and prohibitions apply to LTR_STRUC whether it be stored on disk, tape, card, punched paper tape, or any other medium of data storage and data manipulation whatsoever.

C. You shall in no case transfer copies of the licensed LTR_STRUC to another party.

D. You shall not be restricted from publishing the results of the use of the search algorithm. In any publication arising from the use of LTR_STRUC provided under the terms of this Agreement, You shall reference UGA as the source of the search algorithm by citing the following reference: McCarthy, E. and J. McDonald. LTR_STRUC: A novel search and identification program for LTR retrotransposons. Bioinformatics. 2003 19(3):362-7.

V. TERM AND TERMINATION:

A. The term of this Agreement shall commence upon the date You accept its terms and conditions and shall continue until terminated in accordance with the provisions herein.

B. UGARF may terminate this Agreement immediately upon written notice to You in the event of Your breach of any material obligation hereunder.

C. You may terminate this Agreement without cause for Your own convenience and at Your own discretion upon thirty (30) days written notice to UGARF (www.ovpr.uga.edu/urf/).

D. Upon expiration or termination of this Agreement, You shall expunge all on-site files derived from or copied on hard disk or the like from LTR_STRUC.

VI. WARRANTY AND OTHER RESPONSIBILITIES:

A. UGARF makes no warranty whatsoever as to the quality or usability of LTR_STRUC other than the fact that it has used its reasonable efforts to prepare LTR_STRUC in a standard usable format which should be accessible on PC- or UNIX-compatible computers. You accept this license with the understanding that there is no warranty of any kind except as expressly set forth in this paragraph, and You accept LTR_STRUC on that basis. Accordingly, UGARF makes no representation or warranty of any kind with respect to LTR_STRUC and expressly disclaims any warranties of merchantability or fitness for a particular purpose and any other implied warranties with respect to the capabilities, safety, utility, or commercial application of ltr_struc including non-infringement of the proprietary rights of third parties.

B. In no event shall UGARF or UGA or their employees, students or agents be liable for incidental, special or consequential damages, or for lost profits, savings, or revenues of any kind, or for lost data or downtime, whether or not ugarf has been advised of the possibility of such damages.

Your click on the “I Accept” button below signifies Your agreement to comply with the terms and conditions of this Site License.
